ADAPTABILITY

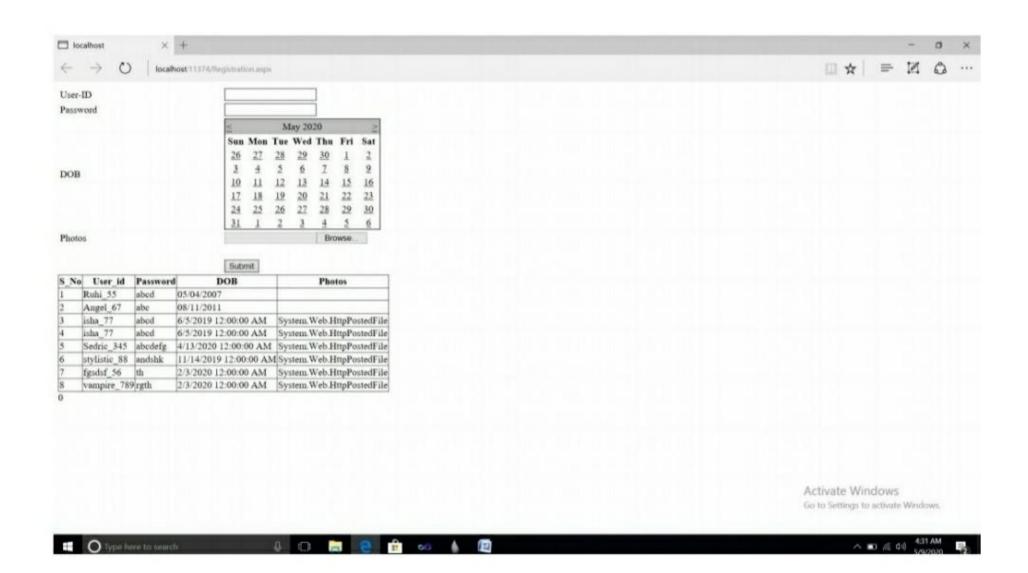

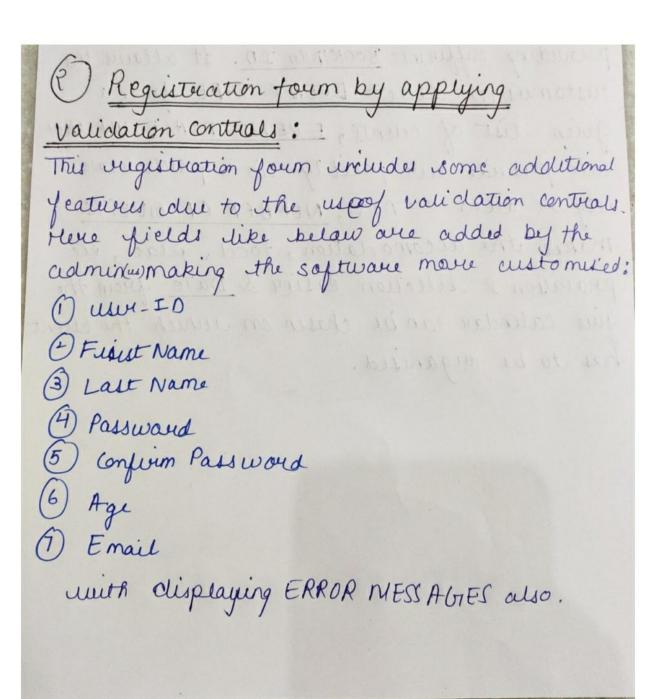

The users who are signing up on using as quest mill have differently made list i.e. list of SIOIN UP MOUSE CHUEST USERS mille be separately maintained. A propour maintained Must make it easy to monitor the registered people. A well organised event without any Sout cef rassle can be conducted e online registration saues the time as well.

1). Registration form using database connectivity and validation controls.

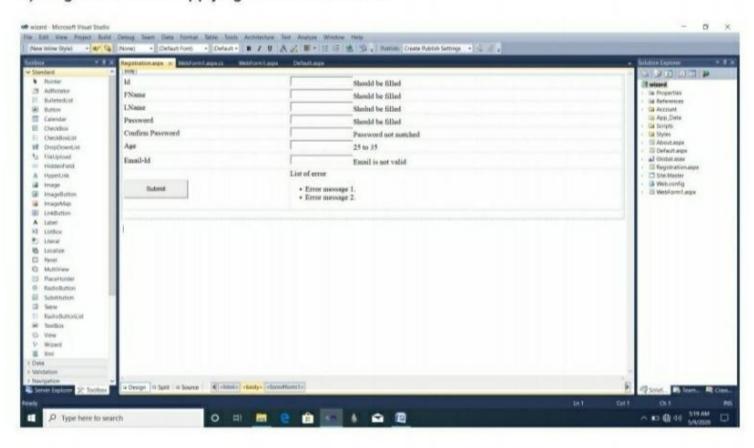

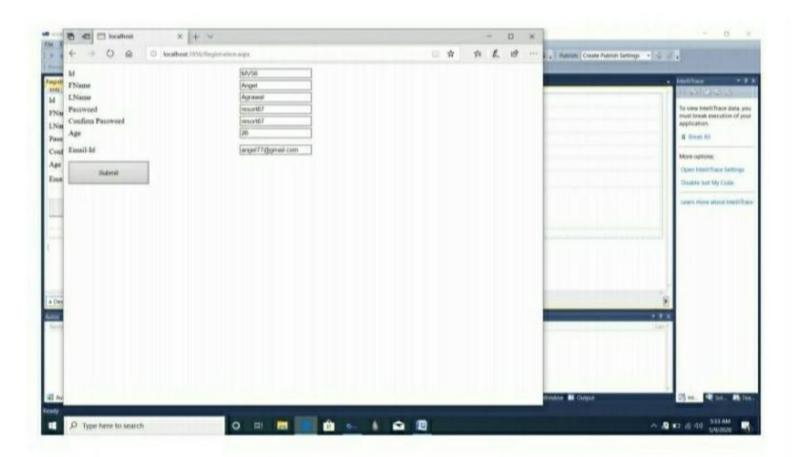

3). Registration form applying validation controls.

HOME PAGIE using master page.

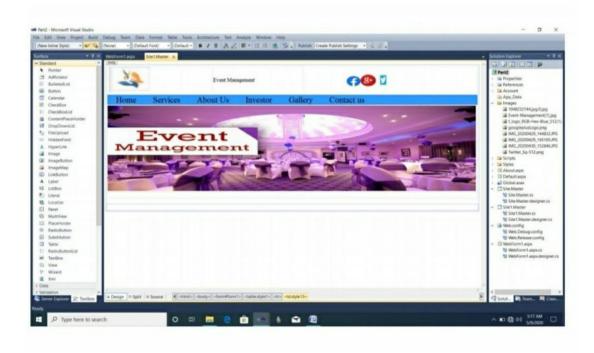

Functionality:

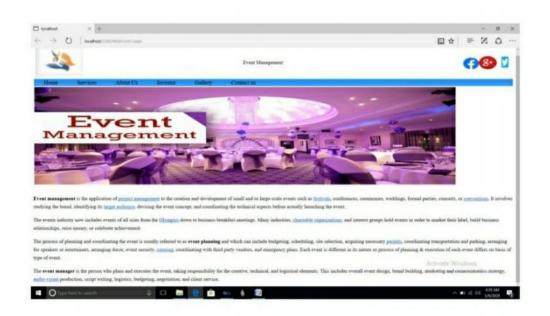

the have initially taken an attractive snap of events which we have alwady organized & tried to grab sustainers attention by this. Also the home page has been added by the tollawing information:

- 1 Home
- (2) service
- (3) About Us
- (4) Investor
- 6 Orallway
- (6) About us

The above features are yet to be morked upon by us. It calso contains the information about event management in case of new users having less knowledge about wat facility we promide.

2). Home page using master page

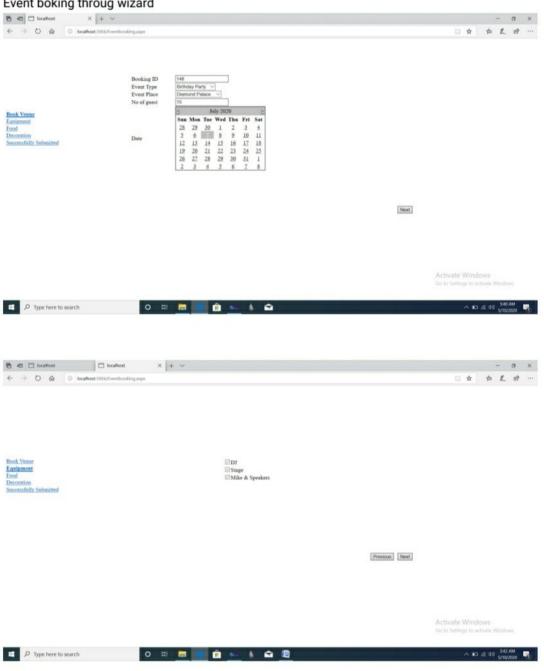

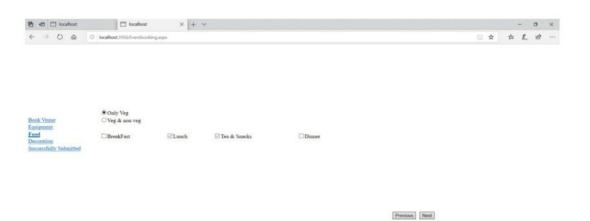

4) Event Booking using univared:

Functionality:

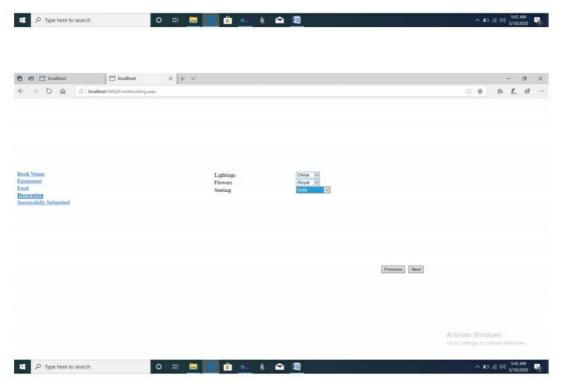

This module facilitates its user to book an cuent. It awards ownlapping of cuents by Perouding different BOOKING ID. It allows the customer to select EVENT TYPE from a guen list of events, EVENT PLACE whether me pramide our facility is a particular city or area are nat, NUMBER OF GUESTS makes the accomodation, food, place, etc promision & selection casion & Date from the que calendar can be chosen on unhich the cuent has to be organised.

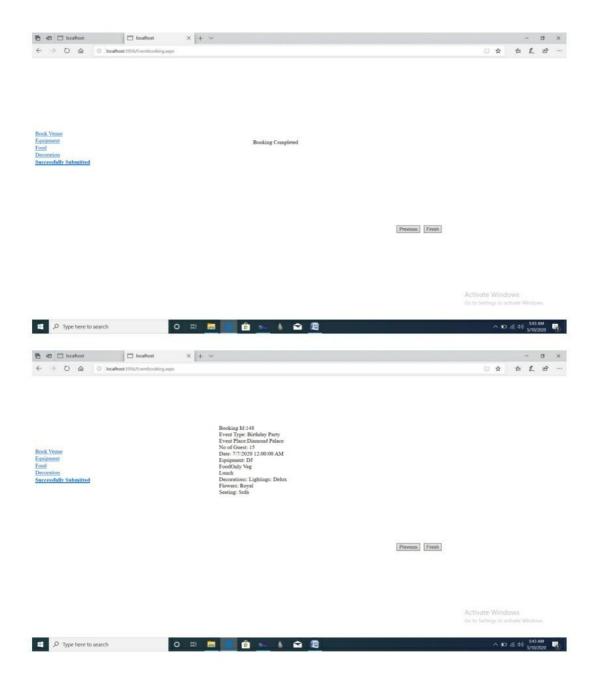

Event boking throug wizard

Activate Windows
Go to Settings to activate Windows.

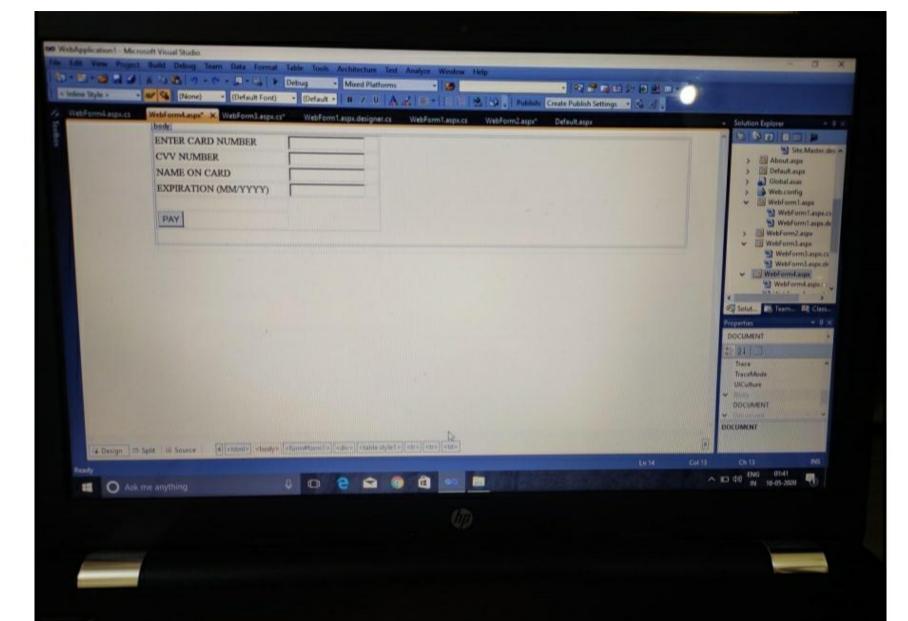

Code at finish button

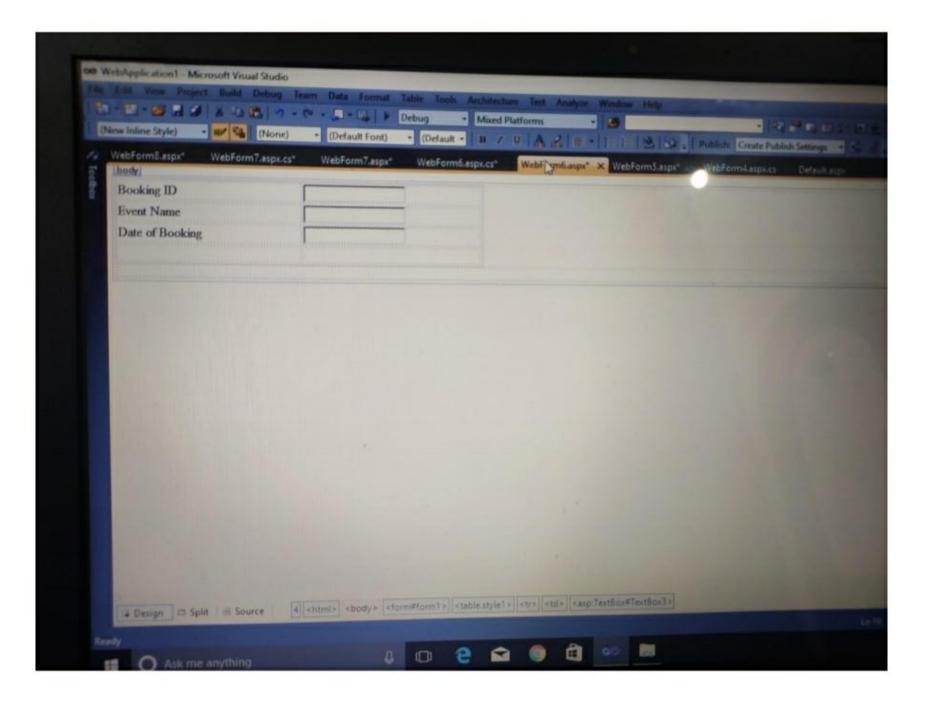

```
protected void Wizard1_FinishButtonClick(object sender, WizardNavigationEventArgs e)
{
    Label1.Text = "Booking Id:"+ TextBox1.Text+"<br>" + "Event Type: " + DropDownList3.SelectedItem +
"<br>" + "Event Place:" + DropDownList4.SelectedItem + "<br>" + "No of Guest: " + TextBox2.Text + "<br>" + "Date: " + Calendar1.SelectedDate + "<br>" + "Equipment: " + CheckBoxList1.SelectedItem.Text + "<br>" + "Food"
+ RadioButtonList1.SelectedItem.Text + "<br>" + "Lightings: " + DropDownList5.SelectedItem.Text + "<br>" + "Seating: " + DropDownList7.SelectedItem.Text +
"<br/>" + "Seating: " + DropDownList7.SelectedItem.Text;
}
```

) Payment This modules allows it austomer to make payment securely. Although we are still working on accepting online payments but for new card acceptance can be done with security

6 EVENT HISTORY RECORDS

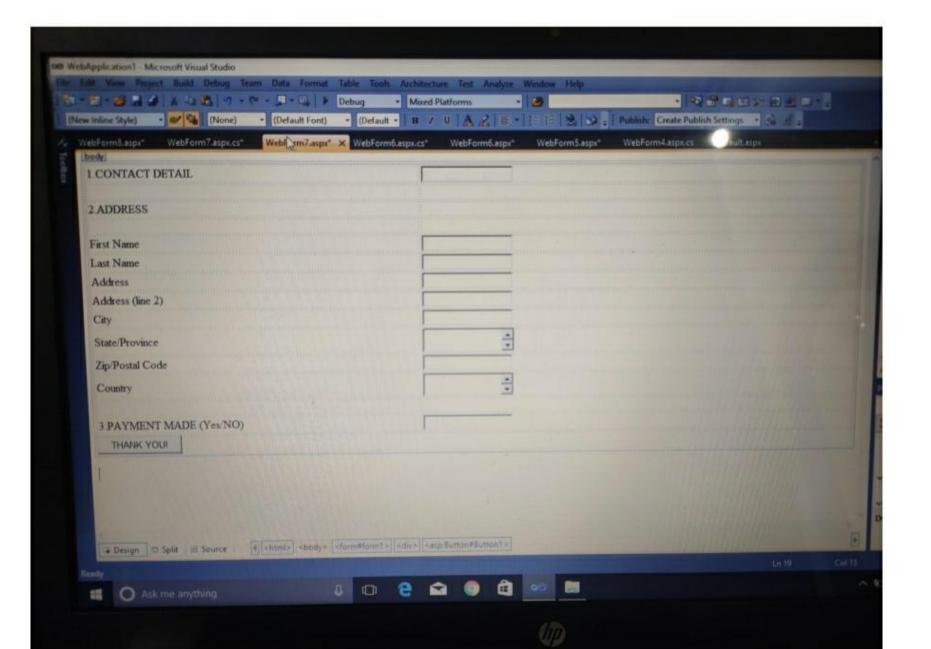

This module allaces us to go through the events which have been averaged by us in the past by murely using compulsory field of BOOKING ID. It also accepts details of event name I Date of Booking.

(7) CHECKOUT MODULE:

Functionality:

It takes down the details of a poison who has booked I event I has completely gat it successful. Here we include CONTACT DETAILS, ADDRESS I PAYMENT MADE options once everything gets cleared the customer is allowed to leave. Or checkout.

(8) RATINGIS ou Customer Relation

- Ship Management: Here, module includes the fudback of customers It allows the customers to reate the organisa tion out of 10, it also takes the COMMENTS, SUCHLESTIONS OR COMPLAINTS if
